Mobile phone payment solutions

Author: [Meritie](#)

Publishing date: 13.11.2002 15:24

Meritie can now offer also mobile phone payment solutions. We operate with innovative and forward-oriented partners. Our product offering consists now also vending and parking applications but our solution is applicable to many other industries as well.

Smart and long-term solutions

Our partner Uphill Oy is an ideal partner for forward-looking organizations who want to gain a significant competitive edge by being innovative players in the mobile commerce on a long-term basis. Uphill 's mobile commerce concept provides ease of use that is based on smart solutions ready for the future.

Now \"we have a leading subscription-based mobile payment service with HUNDREDS OF THOUSANDS customers in operation. Uphill is seen as the preferred partner in establishing mobile payment solutions.\"

We together with Uphill are dedicated to meet your business needs in the area of mobile payment. Our goal is to make it possible for your customers to use their mobile phones as their wallets.

Our business units are divided into four business areas:

Car wash
Ticket printer
Vending machines
New services

All business units target to improve mobile phone usage and help innovative businesses to drive their market forward.

Have you ever experienced the situation where you're standing in front of a vending machine and would like to buy a cool drink, but you either don't have any loose change or not the right amount? Until now, when that happened you either had to ask someone for change or give up on your desired article.

List of locations (vending machines):
[german \(download pdf: 79 kB\)](#)

Thankfully, all that's part of the past and it's now possible to buy your desired articles at labelled vending machines with the help of your mobile phone; and when you make purchases in this way the amount you owe will appear on your next Swisscom Mobile invoice or will be deducted directly from your account if you're a NATEL-easy customer.

How this new service works:

All you have to do is punch in on your mobile phone the number indicated on the vending machine, press the "send" key and select the desired article on the vending machine keyboard. An SMS message will then be sent to you acknowledging your purchase.

No special device is necessary and payments of this type can be made with every mobile phone and with every Swisscom Mobile subscription. For the time being this service is available exclusively to Swisscom customers in Switzerland at specially labelled Coca-Cola vending machines where a 25 cent charge will be added to each purchase made at these vending machines.

Where this service can be used:

Coca-Cola is currently working at equipping its vending machines nationwide for this service, and by the end of the year more than one hundred machines will be operational. In the future it is envisaged that other articles from other service companies will also be available for purchase via mobile phones.

Vending machines reinvented

Uphill's applications can be used in various on-the-spot vending machine applications which make your everyday life, holiday trips and hobbies a truly enjoyable experience. Cash or tokens are no longer needed.

- Soft drinks
- WebSurfing
- Various clean-up services
- Games & Entertainment
- Golf ball machines
- Photos and Copies
- Electricity sockets
- Parking

From phone to a personal agent

Uphill offers you refreshing moments - you can now pay soft drinks on your mobile phone bill. You can dial drinks from mobile-operated automates independently of your own mobile operator. Any mobile subscription will do. Just call the given service number of your favourite drink and soon after that you can pick an ice-cold bottle from the automate.

Go surfing!

Pay surfing time by your mobile phone! Dial the service number on the screen of your surfing point - and you get surfing time. After the call, the sum of mobile money appears on the screen. Every new call adds surfing time and will be specified on your next mobile phone bill as for example: 1 € + mpp.

Public Laundry Machines

Public laundry machines are traditionally places where coins or tokens must always be at hand. Now you can forget that part of the trouble. Just place your dirty cloths or carpets into a machine, choose a suitable programme and dial a service number dedicated for it. Simple, isn't it?

Kiddie Rides

Sometimes difficult to calm down your children? Certainly, if you all have to wait too long. Put him or her on a carousel ride by your mobile phone. Even if you'd run out of money or you have only wrong currency in your pockets, mobile payment brings a comfort.

Jukebox

Jazz up the feeling by mobile phone! You can now play your favourite jukebox hits by Uphill mobile payment system. Also many other kind of melodies can be ordered by Uphill mobile payment system...

Hole-in-100?

When you enter the range, you probably don't want to carry a heavy wallet in addition to your golf equipment. However, balls often run out. Now they are handily available from golf ball automates, without tokens. Just make a telephone call to our service number, and you have plenty of balls again.

Mobile payment is already in use in about fifteen golf ranges around Finland.

Photo Booths

Sometimes you may need passport photos in a real hurry. Just drop in the photo booth, dial the given service number on your mobile phone - and smile!

You will be charged of your photos later, on your mobile phone bill.

Electricity sockets in public places

Dial electricity from a public socket of a high-way rest stop, and your caravan is ready to rock again! Also electricity can be paid by mobile phone.

Park Your auto-mobile

With our parking ticket application you use your mobile instead of coins. After calling the appropriate number you will get the ticket just as you would when using coins.

No more coins; easy!
